

*Collect. Czech. Chem. Commun.*  
2007, 72, 129–152

### The Nearly Degenerate Triplet Electronic Ground State Isomers of Lithium Nitroxide

Justin M. Turney and Henry F. Schaefer III

*Collect. Czech. Chem. Commun.*  
2007, 72, 153–163

### A Fundamental Relation of Molecular Informatics on the Information-Carrying Properties of Density Functions

Paul G. Mezey

Holographic Electron Density  $\Rightarrow$  Molecular Informatics

*Collect. Czech. Chem. Commun.*  
2007, 72, 164–170

### A Note About the Ground State of the Hydrogen Molecule

Alexander V. Turbiner and  
Nicolais L. Guevara

$$\Psi^{(\text{trial})} = A_1\Psi_1 + A_2\Psi_2 + A_3\Psi_3$$

$$\Psi_1 = (1 + P_{12})(1 + P_{AB}) e^{-\alpha_1 r_{1A} - \alpha_2 r_{1B} - \alpha_3 r_{2A} - \alpha_4 r_{2B} + \gamma_1 r_{12}}$$

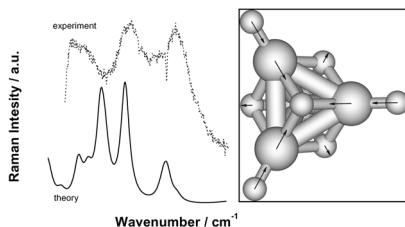

$$\Psi_2 = (1 + P_{12}) e^{-\alpha_5 (r_{1A} + r_{2B}) - \alpha_6 (r_{1B} + r_{2A}) + \gamma_2 r_{12}}$$

$$\Psi_3 = (1 + P_{12}) e^{-\alpha_7 (r_{1A} + r_{1B}) - \alpha_8 (r_{2A} + r_{2B}) + \gamma_3 r_{12}}$$

*Collect. Czech. Chem. Commun.*  
2007, 72, 171–184

### Raman Spectroscopy of Nanocrystalline Li-Ti-O Spinel and Comparative DFT Calculations on $\text{Ti}_y\text{O}_z$ and $\text{Li}_x\text{Ti}_y\text{O}_z$ Clusters

Jakub Jirkovský, Kateřina Macounová,  
Hartmut Dietz, Waldfried Plieth, Petr Krtil and  
Stanislav Zálíš

*Collect. Czech. Chem. Commun.*

2007, 72, 185–196

### On the Magic Character of $\text{Al}_6\text{Au}^-$

Michele L. Kimble, Albert W. Castleman, Jr.,  
Jose U. Reveles and Shiv N. Khanna

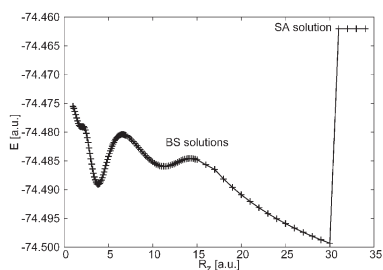

*Collect. Czech. Chem. Commun.*

2007, 72, 197–222

### Hartree–Fock Stability and Broken Symmetry Solutions of $\text{O}^{2-}$ and $\text{S}^{2-}$ Anions in External Confinement

Filip Holka, Pavel Neogrady,  
Miroslav Urban and Josef Paldus

*Collect. Czech. Chem. Commun.*

2007, 72, 223–251

### Artificial Chemistry and Replicator Theory of Coevolution of Genes and Memes

Vladimr Kvasnicka and Jir Pospchal

*Collect. Czech. Chem. Commun.*

2007, 72, 252–268

### The Quantum Mechanics of Cohesion

$$H_{\text{spin}} = E_0 + E_1(\mathbf{S}^A \cdot \mathbf{S}^B) + E_2(\mathbf{S}^A \cdot \mathbf{S}^B)^2 + \dots$$

Roy McWeeny

*Collect. Czech. Chem. Commun.*  
**2007, 72, 269–277**

**The Absolute Entropies of Alkali  
Metal Borides. Simple Patterns and  
High-Level Calculations**

Ivan Černušák, Martina Čukovičová,  
Alexandra A. Asiama, Susan K. Gregurick,  
Paul A. Hoover, Sarah C. Tsay and  
Joel F. Liebman

$$S^*(XY) = 1/2[S^*(X_2) + S^*(Y_2)]$$

*Collect. Czech. Chem. Commun.*  
**2007, 72, 278–295**

**Quantum Effects on the Caloric  
Curves of Lithium Clusters**

Fernand Spiegelman and  
Florent Calvo
